Anchor device type A
Type: ABS-Lock® LOOP

13.2 Description

The anchor device type: ABS-Lock® LOOP (Figure 1) secures not more than 3 persons against fall from a height. The anchor device is made of corrosion-resistant steel wire of Ø 5 mm diameter and its total length is 504 mm. Both ends of the wire rope are pressed into loops. One loop is fastened to the building structure and is 142 mm long. The user's personal protective equipment against fall from a height can be attached to the other loop (123 mm long).

The anchor device is mounted to the building structure by the larger of the two loops and a mounting bracket (t = 3 mm) as shown in Figure 2. The fastening elements are chosen as required for the surface of the building structure.
